

Explain proper scenario for following ping errors ?

Destination host unreachable

* When the ^{destination} network is not in our ~~own~~ pc route table then the destination host unreachable error occur.

Request timed out

* When the two pc are communicating the first pc will ping the second pc. the first pc will send the data to Next pc. with router. the second pc want to send reply message at that time second pc must want to send reply message but the pc ~~did~~ didn't send the message mean in first pc Request time out will be occur.

Reply from some ip destination host unreachable

* ~~parva~~

* In this scenario the pc is incorrect static route the pc will send the message to destination pc. but the Router 1 should have the next hop route but Router ~~did~~ didn't the next hop route means this Error is occur.
